

# PROJECT UPDATE

## Dock Improvement Update

We are excited to share with you the news of our upcoming dock improvement project at Universal Terminals - Morrisburg. The Tomlinson Group of Companies is committed to providing safe and efficient facilities for its clients, and this project is an important step towards achieving that goal.

The project aims to improve the existing facilities by installing a 104m section of sheet pile to create a new wharf face in between two existing dock structures known as dolphins. These improvements will create a safe and stable platform to make it easier to load and unload different types of cargoes and accommodate a wider variety of vessel types.

We are working closely with provincial and federal regulators along with the local conservation authority to ensure that all permits and requirements are in place for construction. Our goal is to begin construction November 2024.

This project is an important investment in our community, and we are committed to minimizing any disruption to our neighbors during construction. We will be providing regular updates on the progress of the project.

## Remediation

At Tomlinson Group of Companies, we take our commitment to the environment seriously. Over the last two summers, we've made significant progress in our soil remediation project. More than 140,000 tonnes of soil have been excavated and placed into treatment cells on site, where we apply a 'biomix' that promotes the growth of bacteria that consumes hydrocarbons. This process takes about a year, and we monitor progress through soil samples. Once treatment is complete, the cells will be deconstructed and the treated soil will be graded back out on site.

UNIVERSAL TERMINALS

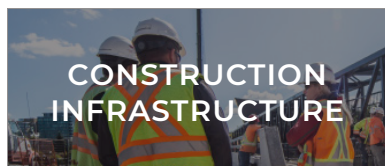

## ABOUT US

**TOMLINSON**  
FOUNDED ON **STRENGTH** GUIDED BY **VISION**

Founded in 1952, Tomlinson is Eastern Canada's leader in environmental services, civil construction, and provision of construction materials. Through six decades of growth and innovation, Tomlinson has evolved into a fully integrated team providing a large array of turnkey services to municipal, provincial, residential, commercial, and industrial customers. Tomlinson boasts a staff of over 2000 skilled professionals and tradespeople. Our size and structure allow us to retain specialized technical expertise and utilize our centralized administrative resources to implement functional quality, safety and environmental management systems. Tomlinson is proud of our industry leading work ethic, unparalleled customer service and an uncompromising approach to safety and the environment.
